CENTER FOR RESEARCH ON EDUCATION OUTCOMES

City Study 2019: Denver

Acknowledgement

- Student-level data were provided by the Colorado Department of Education.
- RootED and Denver Public Schools assisted CREDO with verifying the list of public schools in Denver.

This Report

- This report on *Denver* is one in a series of studies examining school performance across selected U.S. cities.
- Performance is defined as how much academic growth students made from one year to the next.
- The performance of students in Denver is benchmarked to the state average, accounting for student characteristics.
- We first track the growth of Denver overall and by sector using data from 2013-14 to 2016-17.
- We then further explore how one-year academic growth for the period ending in Spring 2017 differs by sector, school type, race, poverty status, English language learner (ELL) status, special education status, and gender.

Types of Charters

- Charter Networks

- Charter Management Organization (CMO): To qualify as a CMO, an organization must oversee the operation of at least three charter schools. Further, the CMO must be the charter holder for all of the schools operated by the CMO.
- Education Management Organization (EMO): To qualify as an EMO, an organization must provide services under contract to at least three separate charter schools, but does not hold the charter for any school they serve. The EMO must answer to the school's charter holder in addition to authorizers and state governance.

- Independent Charter Schools

- To qualify as an independent charter school, an organization must oversee the operation of a single charter school. The charter-holding organization may run the school directly or they may contract with an organization which provides services to one or two charter schools.

Denver-Specific Analysis

- The Denver City Report includes analysis for an additional sector: Innovation Schools.
- Three types of innovation schools
 - District-run innovation schools: district-managed public schools with a strategic plan that allows waivers to specific district policies, state statutes, and collective bargaining agreements with the goal of improving student outcomes and executing with excellence a specific model
 - Innovation zone (iZone): a group of public innovation schools that share common interests and seek additional flexibility
 - Schools with innovation status in an Innovative Management Organization (IMO), which is group of public schools that share a model and are overseen by an executive principal, with the ability to leverage their resources across school sites
- Learn more at: <https://portfolio.dpsk12.org/dps-family-of-schools/>

Presentation of Results

- The results display two sets of comparisons
 - The progress of Denver students is **benchmarked against the state average learning gains, accounting for student characteristics.**
 - Positive numbers represent better than average performance.
 - Negative numbers represent worse than average performance.
 - Significance in the difference between students in the city and the average state performance is represented by black asterisks.
 - The progress of charter school students within Denver is then **compared to the performance of similar TPS students within Denver.**
 - Significance in the difference between a student group in charter schools and the same student group in TPS is represented by colored asterisks.

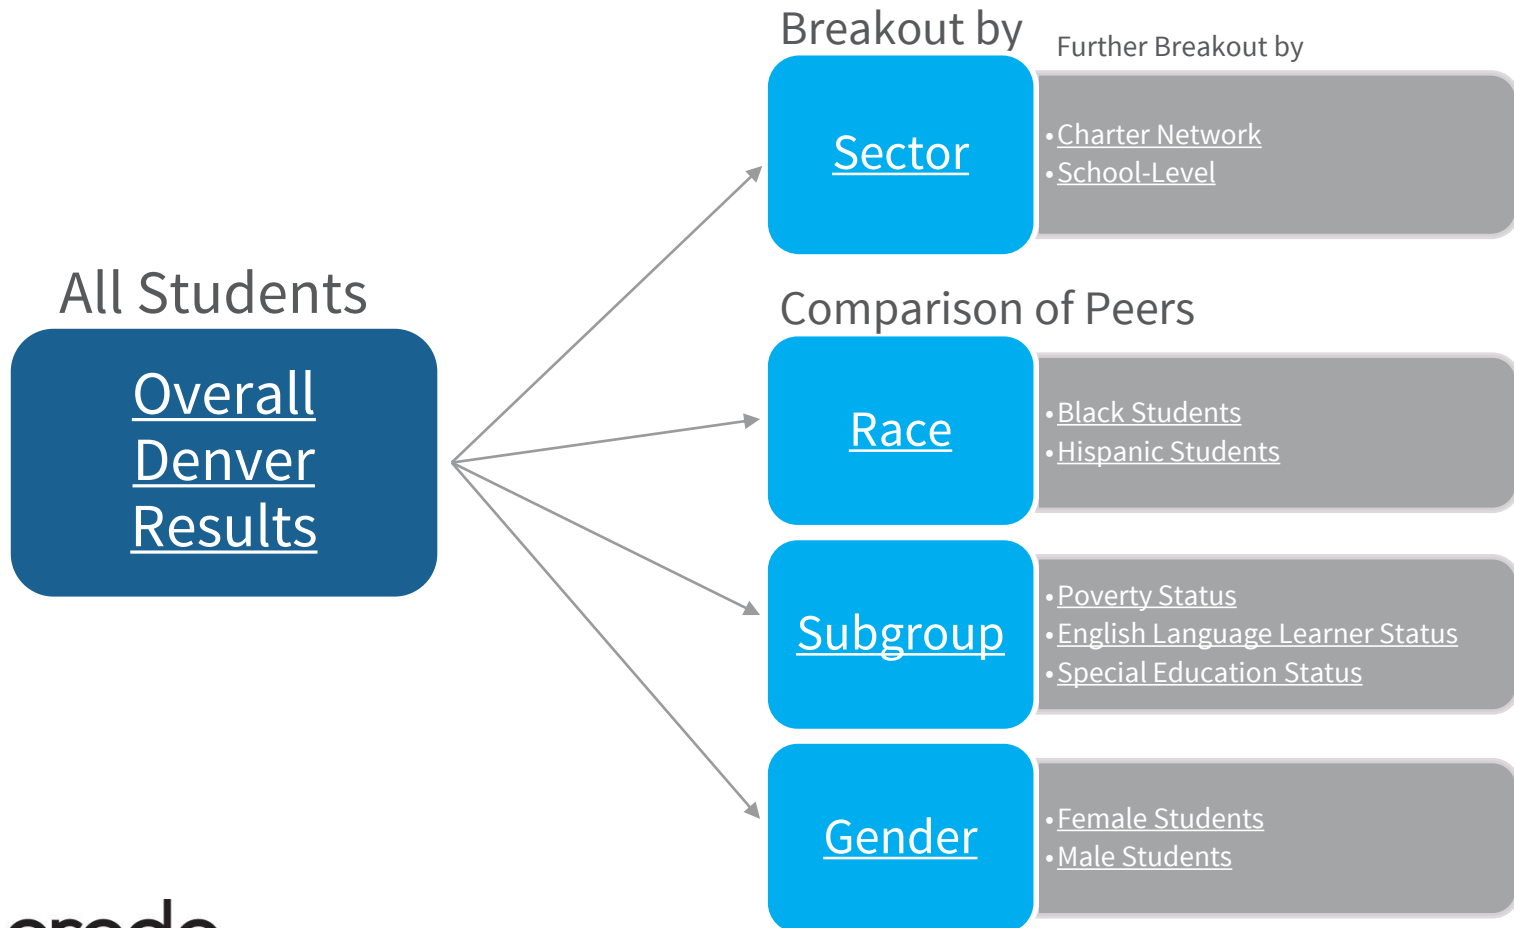

Measurement of Academic Growth

- Results are graphically displayed on two axes:
 - The left axis indicates learning gains of Denver students relative to the average learning gains of students with similar characteristics in the state, measured in **standard deviation units**.
 - The right axis displays the same learning gains measured in **days of learning**.
 - The baseline of 0.00 represents 180 days of learning.
 - Positive performance translates to greater gains in days of learning.
 - Negative performance translates to fewer gains in days of learning.
- The table below shows a transformation of standard deviation units to days of learning.

Standard Deviations	Days of Learning
0.05	30
0.10	59
0.15	89
0.20	118
0.25	148
0.30	177
0.35	207

Roadmap for Graphs

This menu includes links to specific analyses throughout the report.
In the following slides, the same menu is shown on the right-hand side.

Denver Analysis: All Students

Average One-Year Learning Gains for All Denver Students Compared to the State Average Learning Gains, by Year and Subject

The 0.00 line represents the average learning gains of the entire state.

These results capture one-year academic growth for the period ending in the Spring of each school year (SY).
